Total Eclipse Talk

Tuesday, June 6, 10:30 a.m.

On August 21, 2017, for the first time since 1979, a total solar eclipse will be visible in the lower 48 continental United States. To experience the wonder of a total eclipse, it will be necessary to position yourself in an 80-mile wide band running from Oregon to South Carolina. Brian Woodruff has traveled around the world to experience 14 total eclipses since 1970. In this talk, he will briefly explain how a solar eclipse happens and how to safely view the eclipse. He will then present his experiences at the eclipses he has attended and try to convey the excitement of witnessing a total solar eclipse. Call 426-6166 to register.
